

## Emkarate – Thinking Outside the Box on Performance and Formulation

THE INDUSTRY requires reliable high performance lubricants which Emkarate RL refrigeration lubricants offer. Emkarate is specifically designed for use with a wide range of today's ozone benign refrigerants. The range, from 5 cSt to above 220 cSt, is crafted to provide high reliability and durability.

Emkarate RL also ensures excellent refrigerant/lubricant solubility, optimum viscosity and lubrication performance across an extreme pressure temperature range encountered in today's compressor systems.

The extreme operating conditions of a modern compressor require reliable and proven lubrication. Before a new lubricant is offered to the market it is tested under a set of extreme conditions, even more severe than those typically found in a system. These endurance tests are run, working with more than 35 different compressor manufacturers.

Emkarate lubricants are designed to give optimum performance for the OEM and service engineer offering additional benefits such as greater energy efficiency, improved sound quality and longer life.

Emkarate is available in a selection of pack sizes.

Emkarate is a trademark of the Lubrizol Corporation

## A-Gas Takes Part in the 2013 Argus Cycle Tour

Following the huge success experienced by A-Gas in the 2012 Argus Cycle Tour, we once again put together a team to participate in the 2013 Tour. The team, which had more participants in 2013 than 2012, was made up of eighteen South African, nine British, one American and three Australian riders.

As was done in 2012, A-Gas used this opportunity to raise funds for The Children's Hospital Trust, the fund-raising arm of the Red Cross Children's Hospital and we would like to thank all who donated to this special cause.

In 2012 A-Gas managed to raise substantial funds for the hospital, which has been put towards the renovation and extension of the Radiology department,

and we look forward to the challenge in 2013 of increasing this contribution.

The support of family, friends, service providers, customers and colleagues helped make the day memorable and we all look forward to the 2014 Tour.
