Environmental Services: A-Gas Offers Complete Lifecycle Stewardship

A-GAS provides customers with the necessary means to be able to meet the requirements of SANS 10147:2009 standards pertaining to refrigerant reclamation and recycling. Our services include the supply of recovery and pump down cylinders/drums, purity testing of refrigerant as well as a waste management program.

Packaging

We provide a fleet of dedicated recovery and pump down cylinders with specialised valve technology. This allows engineers to retrieve waste refrigerant in a safe and environmentally responsible manner. We have 8kg and 45kg cylinders as well as 850kg drums available.

Recovery cylinder

Pump down cylinder

Returns

A-Gas recovery and pump down cylinders should be returned to your nearest A-Gas or Metraclark branch for the recycling of unwanted refrigerants.

Product Management

Our waste management program includes a cylinder tracking system, utilising barcode technology which allows for full traceability of material.

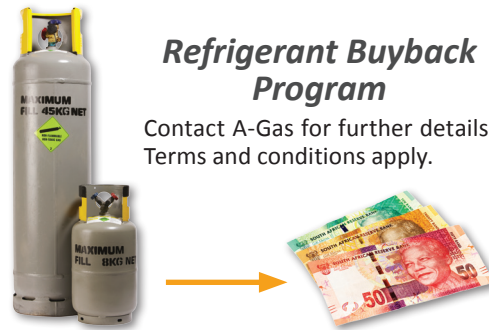

Certification

Issuing of certificates to the customer to ensure traceability of returned refrigerant.

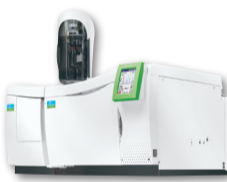

Refrigerant Buyback Program

Contact A-Gas for further details. Terms and conditions apply.

Laboratory

The A-Gas laboratory is fully equipped to check refrigerants for moisture, residues, non-condensables and acidity to ensure refrigerant, after cleaning, complies with AHRI 700 standards and therefore can be classified under SANS 10147:2009 as 'reclaimed'.

MORE AWARDS FOR A-GAS

THE BVCA Management Team Awards are a year-long process of regional and national nominations and judging established to celebrate the achievements of private equity and venture capital-backed portfolio companies. These are the only awards to recognise the positive impact of private equity and venture capital-backed companies on the British and global economies and to commend the achievements of the management

teams that create, nurture and lead them. Following a series of regional heats, the 2013 national award winners were announced on July 4th 2013 at a black tie dinner and ceremony in London. Congratulations to John Rutley for winning CEO of the Year (Wales & South West) and also to A-Gas International collecting the International Impact Management Team of the Year (Wales & South West). Winners of the regional

heats for the seven categories were automatically put forward for selection at the national stage where A-Gas also collected the national award for Mid-Market Management Team of the Year (Wales & South West). We are also pleased to report that International Track 200 has moved A-Gas from 176th to 119th in its listing of the Top 200 UK Private Companies with the Fastest Growing Overseas Sales.

A-Gas Achieves ★★★★★ NOSA Safety Rating

NOSA is the leading global supplier of occupational risk management services and solutions, and is proudly the most recognised brand in the SHEQ risk management industry. It is the exclusive provider of both the NOSA Five Star Grading System and SAMTRAC.

A-Gas is the number one supplier to the South African foam, refrigeration and air conditioning markets. We are proud to offer the following:

- State-of-the-art filling and blending plants with in-house laboratory facilities
- Nine bulk storage tanks with over 500 metric tonnes of storage capacity
- Drum and cylinder fleet in excess of 19 000 with cylinder tracking facilities
- Environmental services: recovery and recycling of refrigerants
- ISO 9001/2000 Quality Accreditation
- ISO 14001 Environmental Accreditation
- NOSA ★★★★★ Rating
